MEMORANDUM FOR: Director of Security

SUBJECT : Office of Security Monthly Report of
Trends and Highlights for October 1974

1. The notable decreases in computer support and compartmented information activities reflect a return to a normal case load following the completion of an extensive purging and associated keypunching operation of a special codeword clearance.

2. Statistics for the Personnel Security and Investigations Directorate indicate a general increase in case activity over last month. The case processing time for 133 regular cases was one day less than the 45-day goal set for FY 1975.

3. The installation and Headquarters testing of the prototype model of the badge machine will commence during the week of 10 November.

4. There is a possibility that an agreement will soon be formalized with the GSA to allow fully cleared Federal Protective Officers assigned to the Agency to work as security escorts in Agency buildings on an overtime basis.
